BLENDING TIPS

Working with hot foods or liquids:

(!!) **WARNING:** When you work with HOT FOODS, remove the jar lid food chute to vent steam. Tilt the lid away from you, partially covering the opening. Keep hands and other exposed skin away from the lid opening to prevent possible burns.

(!!) When you work with HOT LIQUIDS, remove the jar lid food chute and start at a low speed, and then gradually increase to a faster speed. Do not add liquid over the 4 cup (1L) level. Always keep hands away from steam.

- Put liquids in the jar first, unless a recipe says otherwise.
- Crushing ice: Crush 6 ice cubes or approximately 2 cups of ice at a time.
- This blender has been designed to gently process foods when operating at low speeds. If blades do not rotate during operation, simply choose a higher speed.
- Do not remove the lid while in use. Remove filler cap to add smaller ingredients. (Figure 6)
- Cut all firm fruits and vegetables, cooked meats, fish and seafood into pieces no larger than 1/2 inch (1.8 cm) to 1 inch (2.5 cm). Cut all kinds of cheeses into pieces no larger than 1/2 inch (1.8 cm).
- This blender will not mash potatoes, whip egg whites or substitute dairy toppings, mix stiff dough or grind raw meat.
